

Medication Management Program

Eligible Medications

Autoimmune Condition Medications Available Now:

- Actemra (tocilizumab) – retail average 30-day supply \$1,100-\$4,400
- Apriso (mesalamine ER) – retail average 30-day supply \$400
- Benlysta (belimumab) – retail average 30-day supply \$4,600
- Cimzia (certolizumab pegol) – retail average 30-day supply \$4,000 - \$13,000
- Cosentyx (secukinumab) -retail average 30-day supply \$6,200-\$24,800
- Dupixent (dupilumab) – retail average 30-day supply \$3,500
- Enbrel (etanercept) – retail average 30-day supply \$5,000 - \$11,000
- Humira (adalimumab) – retail average 30-day supply \$10,000 - \$15,000
- Ilaris (canakinumab) – retail average 30-day supply \$16,000 - \$17,000
- Kevzara (sarilumab) – retail average 30-day supply \$3,000 - \$3,500
- Lialda (mesalamine DR) – retail average 30-day supply \$1,100
- Mesalamine – retail average 30-day supply \$300-\$1,000
- Olumiant (baricitinib) -retail average 30-day supply \$2,300-\$4,600
- Orencia (abatacept) – retail average 30-day supply \$4,000 - \$4,500
- Otezla (apermilast) – retail average 30-day supply \$1,500 - \$4,000
- Pentasa (mesalamine ER) – retail average 30-day supply \$700
- Rasuvo (methotrexate) – retail average 30-day supply \$500
- RINVOQ (upadacitinib) – retail average 30-day supply \$4,000 - \$5,000
- Simponi (golimumab) – retail average 30-day supply \$4,500 - \$5,000
- Skyrizi (risankizumab-rzaa) – retail average 30-day supply \$17,000
- Stelara (ustekinumab) – retail average \$12, 700 - \$24,600 per syringe (30-90 day supply)
- Taltz (ixekizumab) – retail average 30-day supply \$6,100 - \$18,200
- Tremfya (guselkumab) -retail average 30-day supply \$12,200
- Xeljanz (tofacitinib) -retail average 30-day supply \$5,000
- Xeljanz XR (tofacitinib) – retail average 30-day supply \$3,000 - \$5,000

Diabetes Medications Available Now:

- Afrezza (inhaled insulin) – retail average \$1,200 per kit
- Basaglar (insulin glargine) – retail average 30-day supply \$300-600
- Bydureon (exenatide) – retail average 30-day supply \$840 - \$860
- Byetta (exenatide) – retail average 30-day supply \$700
- Farxiga (dapagliflozin) – retail average 30-day supply \$500
- Fiasp (insulin aspart) – retail average 30-day supply \$500-\$1,000
- Glargine Insulin (lantus, toujeo) – retail average 30-day supply \$535 - \$900
- Glyxambi (empagliflozin/linagliptin) – retail average 30-day supply \$500
- Humulin (insulin regular) – retail average 30-day supply \$40-\$1,000
- Invokamet RX (canagliflozin/metformin) – retail average 30-day supply \$530

- Invokana (canagliflozin)– retail average 30-day supply \$530
- Janumet (metformin/Sitagliptin) – retail average 30-day supply \$443 - \$670
- Januvia (sitagliptin) – retail average 30-day supply \$555 - \$780
- Jardiance (empagliflozin) – retail average 30-day supply \$600 - \$690
- Jentadueto (linagliptin/metformin) – retail average 30-day supply \$450
- Levemir (insulin detemir) – retail average 30-day supply \$300-\$800
- Lispro Insulin (humalog) – retail average 30-day supply \$260 - \$1,200
- Lyumjev (insulin lispro) – retail average 30-day supply \$400-\$800
- Novolog (insulin aspart) – retail average 30-day supply \$300-\$1,000
- Ozempic (semaglutide) – retail average 30-day supply \$965 - \$980
- Rybelsus (semaglutide) – retail average 30-day supply \$800
- Soliqua (insulin glargine/lixisenatide) – retail average 30-day supply \$700
- Steglatro (ertugliflozin) – retail average 30-day supply \$300-\$900
- Synjardy (empagliflozin/metformin) – retail average 30-day supply \$500
- Tradjenta(linagliptin) - retail average 30-day supply \$450
- Tresiba (insulin degludec) – retail average 30-day supply \$300-\$600
- Trijardy (empagliflozin/linagliptin/metformin) - retail average 30-day supply \$500
- Trulicity (dulaglutide) – retail average 30-day supply \$921 - \$970
- Victoza (liraglutide) – retail average 30-day supply \$750
- Xigduo (dapagliflozin/metformin) - retail average 30-day supply \$500
- Xultophy (insulin degludec/liraglutide) - retail average 30-day supply \$1050

NOTE: The wide range of anticipated costs for some of the medications is based on dosing differences (once per day vs. twice per day) and the number of tablets, ml, or units per dose.
